

Survey Summary Documentation

Purpose The Survey Summary describes some basic characteristics of your YRBS.

Example

2013 YOUTH RISK BEHAVIOR SURVEY RESULTS

Metropolis High School Survey
Survey Summary

The 2013 Youth Risk Behavior Survey (YRBS) was completed by 1,208 students in 45 public high schools in Metropolis during the spring of 2013. The school response rate was 100%, the student response rate was 80%, and the overall response rate was 80%. The results are representative of all students in grades 9-12. The weighted demographic characteristics of the sample are as follows:

Female	50.0%	9th grade	30.7%	Black*	19.7%
Male	50.0%	10th grade	25.0%	Hispanic/Latino	62.1%
		11th grade	23.1%	White*	8.8%
		12th grade	21.0%	All other races	6.0%
		Other	0.2%	Multiple races	3.3%

Students completed a self-administered, anonymous, 99-item questionnaire. Survey procedures were designed to protect the privacy of students by allowing for anonymous and voluntary participation. Local parental permission procedures were followed before survey administration.

The YRBS is one component of the Youth Risk Behavior Surveillance System (YRBSS) developed by the Centers for Disease Control and Prevention in collaboration with representatives from state and local departments of education and health, other federal agencies, and national education and health organizations. The Youth Risk Behavior Surveillance System was designed to focus the nation on behaviors among youth related to the leading causes of mortality and morbidity among both youth and adults and to assess how these risk behaviors change over time. The Youth Risk Behavior Surveillance System measures behaviors that fall into six categories:

1. Behaviors that result in unintentional injuries and violence;
2. Tobacco use;
3. Alcohol and other drug use;
4. Sexual behaviors that result in HIV infection, other sexually transmitted diseases, and unintended pregnancies;
5. Dietary behaviors; and
6. Physical Activity.

The YRBS also measures asthma and self-reported height and weight to allow calculation of body mass index for assessment of overweight and obesity. More information about the Youth Risk Behavior Surveillance System can be obtained from <http://www.cdc.gov/yrbss>.

*Non-Hispanic.

Content The Survey Summary describes:

- The number of students and schools that participated.
- When the survey was conducted.
- The school, student, and overall response rates.
- The population of students that the results represent
- Weighted (unless your data are unweighted) distributions of students by sex, grade, and race/ethnicity.
- The number of items on your questionnaire.
- An overview of the Youth Risk Behavior Surveillance System.
